Engineering Services Division
1661 Senter Road, Building A, 1st Floor
San José, California 95112
(408) 975-7381

January 16, 2009

ADDENDUM NO.1

**FOR THE
REQUEST FOR QUALIFICATIONS (RFQ) – ON-CALL PHOTOGRAMMETRIC SERVICES**

Notice is hereby given that the following clarifications, revisions, additions, and/or deletions are hereby made a part of and incorporated into the RFQ – On-Call Photogrammetric Services.

QUESTIONS AND ANSWERS

1. Question #1

Is this work for photogrammetry consultants only or can a consultant submit qualifications with a photogrammetrist as a sub-consultant?

Answer #1

The intent of this RFQ is to obtain SOQs from qualified firms or individuals who will be directly performing the work and services described in the RFQ. **Submittals that include the use of subconsultants or persons other than the consultant will not be considered.** The City of San Jose Survey Section will manage the survey services, such as the establishment of the aerial control, related to the photogrammetry product.

2. Question #2

Will there be more than one consultant selected to perform photogrammetric related services for the City under this RFQ?

Answer #2

Per the Request for Proposals, the numerically highest two (2) ranked consultants based upon the screening qualifications scores could be selected to begin negotiations with the City for up to two (2) agreements to provide photogrammetric survey services.
